A brief description of the project

CommuniCity is a 3-year transformative citizen-centred initiative, which will launch 100 Tech Pilots in Europe. The project will increase the effectiveness of socio-technical forms of engagement while empowering hard-to-reach communities. The project is a continuation of H2020 OrganiCity and SynchroniCity

The initial phase of the Pilots will target communities from **Amsterdam, Helsinki, and Porto**. At a later stage, CommuniCity will expand to the cities of **Aarhus, Barcelona, Rotterdam, and Tallinn**.

The Pilots aim to create living laboratories through **co-creation and co-learning** processes where solutions can be tested to improve the quality of life of hard-to-reach communities and facilitate their connection to their respective cities.

CommuniCity builds on recognized European and national innovation programs, methods, living labs, and platforms. Through Virtual Learning Labs, the project will host open workshops, interactive learning sessions, and open debates for capacity building and citizen engagement.

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Health and Digital Executive Agency (HaDEA). Neither the European Union nor the granting authority can be held responsible for them.

The project will invite cities and communities to propose interventions during three funded **Open Calls for projects in 2023 and 2024**, at regional, national, and European levels. The first Open Call round will open in January 2023.

CommuniCity is part of a bigger movement for digital transformation. Join us in this mission of digital capacity building, involving citizens across Europe!
