Be.Neutral – Mobility Agenda for Carbon Neutrality in Cities

TOTAL AGENDA INVESTMENT | 221.376.867,92€

Porto Digital INVESTMENT | 502,94 €

MEASURE | Agendas Verdes para a Inovação Empresarial

BENEFICIARY ENTITY | Porto Digital

START DATE | 1 outubro 2021

COMPLETION DATE | 31 dezembro 2025

TOTAL AGENDA FINANCIAL SUPPORT | 128.191.402,26€

PORTO DIGITAL FINANCIAL SUPPORT | 502,94 €

OBJECTIVES AND EXPECTED RESULTS

Be.Neutral aims to position Portugal as an exporter of cyber-physical mobility products with zero carbon emissions for cities worldwide.

It was designed to seize the opportunity to develop, industrialise, and operate new mobility products and services (physical devices, connectivity, and data science platforms) capable of real-time quantification of emissions avoided to accelerate carbon neutrality by 2030.

This project involves the active participation of Porto Digital as a co-promoter, representing the Municipality of Porto, with extensive experience in co-creation and empowerment activities. Porto Digital has previously engaged in such activities in other funded projects, such as CityCatalyst and SynchroniCity. Within the Be.Neutral agenda, this experience will be shared with other partner cities.

The agenda encompasses a group of cities that will serve as living laboratories for testing and demonstrating best practices, products, and services developed. This includes Porto, represented by Porto Digital, as well as Matosinhos, Vila Nova de Gaia, Braga, Guimarães, Vila Nova de Famalicão, Viana do Castelo, Oliveira de Azeméis, and Vila do Conde. Through this collaboration, the goal is to accelerate the transition to carbon neutrality in these cities by promoting changes in citizen behaviour and developing new climate policy instruments.
