Start Date | 01.04.2023

Completion Date | 30.09.2025

Total Eligible Investment | €845.000

Funding Program | Recovery and Resilience Plan

Brief Project Description | The Bombarda Digital project, promoted by the Municipality of Porto, Associação Porto Digital and Associação Quarteirão Criativo, brings together the stakeholders of the Miguel Bombarda Quarter (Porto) around the digital extension of a creative neighborhood. The area's boundaries and identity were historically defined by the merchants of this specialized zone, recognized as the Arts Quarter. The project aims to support the digitization of the Quarter, promote territorial cohesion through technological adoption and the digitization of businesses, and sensitize and empower stakeholders. It also aims to promote urban harmony, connectivity, sustainability, and social inclusion. It is believed that this Digital Creative Quarter, with a distinct and strong personality, meets the ideal requirements for leveraging its physical and digital commercial experience, demonstrating high potential for economic value, showcasing, and scalability.
