Objectives, activities and expected/achieved results|

The Municipality of Porto has sought to increasingly establish the city as a Smart City, designing and implementing strategies and projects with a significant impact in various areas. Through the implementation of new methods of management and public administration, as well as promoting the creation and use of participatory tools and the provision of new services to citizens, the Municipality of Porto seeks to ensure the development of the municipal strategy for digital transition and innovation in accordance with the following objectives:

- Make Porto an attractive and dynamic city, functioning as a hub of innovation and experimentation in the region;
- Strengthen the commitment to the digital economy, attracting investment and promoting job creation;
- Contribute to digital inclusion with a special focus on disadvantaged communities;
- Promote the acquisition and exchange of knowledge and experiences;
- Improve citizens' quality of life;
- Strengthen governance by making it more transparent, participatory and informed;
- Contribute to the development of citizen services in a co-creative model.
